

AC POWER TRANSDUCER (4-20mA)

PRODUCT DESCRIPTION

PWT series of Power Transducers are designed for the measurements of AC electric power with high linearity and high accuracy. Input Voltage can be selected between DC $\pm 15V$ and AC110V. It is solution for isolating the sensor output and the current carrying conductor.

KEY FEATURES

- Standard 4-20mA output
- Low cost
- High linearity
- High accuracy
